

# Men's Business

What are the specific  
issues in haemophilia?

**Prevention is better than the  
cure**

- Prophylaxis
- Adjust your on demand  
treatment

**Muscle bleed**

- Treat as normal  
muscle bleed

**Joint bleed**

- Treat as  
normal joint  
bleed

**Remember like always if  
the bleed fails to respond  
to your treatment as you  
would expect, present to  
your Haemophilia centre  
or A and E department**
