Haemophilia Conference 2011*

Carers NSW

Carers NSW is the peak organisation for 849, 700 people of all ages providing care for family members or friends with a disability, mental illness, drug and alcohol dependencies, chronic condition or who are frail in NSW

Profile of Carers (ABS 2009)

- 771,400 primary carers in Australia
- 2,632,000 people are carers or 12.2% of the Australian population
- Most primary carers are female (68%)
- 35% of primary carers spend 40 hours of more caring a week
- Over 30% of carers have been caring for more than 10 years

Why do carers care?

- Family responsibility
 - 66.9% of carers caring for a child did so out of a sense of family responsibility
- Can provide better care
- Emotional obligation

Carers' wellbeing

- The Australian Unity Wellbeing Index found that carers have the lowest collective wellbeing of any group
- Carers have an average rating on the depression scale that is classified as moderate depression
- Recent research also reveal carers have lower wellbeing, including mental wellbeing

The impact of caring

It can be difficult for many carers to think about the impact of caring:

- They may have been caring for some time
- They may feel worn out emotionally
- They may feel exhausted physically
- They may not be able to take breaks
- They may be consumed with worry for the person they care for
- They may have increased expenses related to caring, and reduced income

Positive aspects of caring

- Satisfaction of learning new skills
- Love and commitment
- Positive impact on relationships
- Relief

For parents

- Parents often have the prime responsibility to investigate their child's condition and learn how to manage
- It can be a juggling act and can impact on family life and relationships

What are the barriers to self-care?

- Guilt
- Grief
- Expectations
- Multiple responsibilities
- Perceived lack of opportunity
- Sense of duty or responsibility
- Beliefs and values about caring

Do this quick check

How long is it since...

- you went to the doctor for you?
- you had a general health check up?
- you spoke in some detail to a doctor about being a carer and what it involves?
- you last had a *refreshing* break?
- you had a good night sleep?
- you did something just for you?
- you had fun?

How often do you...

- feel tired most of the time?
- feel exhausted?
- eat regularly?
- have trouble concentrating?
- feel frustrated, lonely or helpless?
- feel as though you aren't coping, or won't be able to cope?
- feel irritable or angry, especially over things that, at other times, you would find quite insignificant?

Looking after you: Strategies

Getting Out

Try to continue with activities you enjoy

Keep Healthy

Regular exercise, meals, and sleep

Planning to look after yourself

Make time for yourself, plan ahead and pace yourself

Planning for the future

Organise ahead of time, make plans for when crisis occurs

Know that you are not alone

Reduce feelings of isolation

Asking family, friends or neighbours to give you a hand

Plan how you will let them know

Take a break
e.g. respite

Practise relaxation
e.g. breathing techniques, yoga, listening to music

Services for carers

- Carer Line
- National Carer Counselling Program
- Young Carers Program
- Carer Life Course e-tool

Carer Line: 1800 242 636

Provides carers with referral to services and tailored information and resources to support carers in their caring role
